

STAARS Release Notes

November 14, 2016

Introduction

STAARS releases are applied to the STAARS Production environment on a regular basis. This aligns with standard industry best practices.

This document describes the changes included in releases from November 8, 2016 to November 14, 2016.

What Does This Mean for STAARS Users?

STAARS releases include *programming improvements* and/or *changes to configurations (settings)*. Each release is tested first, and then applied to the *Production* environment (the environment that STAARS users work in).

What Is Included in This Release?

The table on the following page(s) lists, for each update, the following information:

- **Incident/Problem ID** – the identifier assigned to an incident (INC) or problem (PRB) when it was logged in the STAARS Support Services ServiceNow database. (“N/A” indicates the problem was tracked outside of ServiceNow.)
- **CGI ISS ID** – the identifier assigned to a modification by the CGI Customer Support Group (CSG) Solutions Center. (“N/A” indicates the problem was not tracked with CSG.)
- **Component/Sub-component** – the STAARS application module and functional area affected by the change.
- **Problem Summary** – a summary of the user experience or result from internal processing that indicated that modification was needed.
- **Resolution Description** – a description of the software modification and/or the new behavior to be expected after the change.
- **Date Applied** – the date the change was applied to the STAARS Production environment.

Incident / Problem ID	CGI ISS ID	Component/ Sub-component	Problem Summary	Resolution Description	Date Applied
PRB0041010	N/A	Purchasing	Procurement Type 23 (Fleet Management) was not needed, as Fleet Management approvals are assigned by commodity.	Procurement Type 23 has been removed.	11/08/2016
PRB0041015	N/A	Security & Workflow	The BFY Staging configuration needed to be updated to allow mass asset depreciation during Stage 7 of a fiscal year.	The BFY Staging configuration has been updated as needed.	11/08/2016
PRB0040856	N/A	Technical	The AFIN-BUD-013 report took too long to run.	A new version of the AFIN-BUD-013 report has been created, which runs significantly faster.	11/09/2016
